INSTALLATION WARNINGS

Proper height adjustments MUST be made to both the leg extension and the hand grip. A dealer or therapist should aid in the proper placement for maximum balance and support.

Be sure that snap buttons are fully protruding through the same respective adjustment hole of each leg extension. This ensures that the adjustable legs are securely locked into position and an even height adjustment is obtained.

Wing nuts MUST be tight at ALL times.

Ensure that rubber crutch tips are not ripped, worn or missing. Replace before using the crutches.

DO NOT use parts, accessories or adapters other than those authorized by Probasics.

The crutches have a recommended weight limit of 250 lbs./pair.

The bariatric crutches have a recommended weight limit of 500 lbs./pair.

HEIGHT ADJUSTMENT

1. ADJUSTING HANDLE POSITION (DETAIL “A”) – Remove the wing nut and bolt securing the handle to the crutch. Align the handle with the desired set of adjustment holes. Secure with wing nut and bolt. Repeat for other crutch.

2. ADJUST THE LEG EXTENSION (DETAIL “B”) – Depress both snap buttons on the leg extension and allow them to snap through the desired adjustment holes on the crutch leg frame. Make sure snap buttons are fully engaged and locked in place before use. Repeat for other crutch.
